# Virtual Chief Information Security Officer

## Responsibility for Information Security

Information is one of a company's greatest assets; many companies now understand Information Security is no longer an IT responsibility but rather is a risk-informed, executive level consideration. An effectively managed and implemented Information Security program is critical to ensure:

- The confidentiality, integrity and availability of information resources, both digital and physical;
- Appropriate mechanisms are in place to help identify and prevent the compromise of Information Security and the misuse of, or interruption in the availability of, data, applications, networks and computer systems;
- Company reputation is protected and legal and ethical responsibilities with regard to information and information systems are satisfied;

## Ingalls Customized Virtual CISO

The Virtual CISO (Virtual Chief Information Security Officer) service offering is specifically designed for companies who understand the need for a comprehensive information security program but do not have the resources for a full-time, dedicated security team.

Information Security is an incredibly dynamic field; it is a significant challenge to identify resources who possess the skill sets and capacity necessary to remain current on cyber threats, the process and technology solutions that mitigate risk, as well as the quickly evolving regulatory environment. Ingalls Information Security provides a team of experts that possess the world class skills and decades of experience your Information Security program needs to be successful.

## Who We Are

Ingalls Information Security is a specialized, Louisiana-based cyber security company with a mission to prevent and respond to data security breaches.

We have responded to some of the largest data breaches known and the experience we gain while working on data security breaches sets us apart. We have seen and have countered the tools and tactics used by criminals and by state-sponsored hackers. Our goal is simple: to use our experience and knowledge to help our customers protect their data. We are committed to preventing and responding to data security breaches. We have the best and most creative people in the industry and can identify areas that you should focus on to enhance your level of security and awareness.

## Our Services

We provide services to a wide range of industries including Financial Services, Healthcare, Nonprofits, the Federal Government, Insurance, Journalism & News, Retail, Technology, Education and more.

Our clients recognize our team of experts as leading providers of Information Assurance services.
